Proud MaMa

Proud MaMa was born from the desire to give women something lasting during their pregnancy, a symbol of connection, peace and style. Our jewelry, especially the bola necklace, is more than just accessories. It's a remembrance; it tells the story of your pregnancy. ♥

The regular Proud MaMa® collection currently exists of: Bola pregnancy necklaces, Bracelets and the MAM collection. [The entire collection is very suitable to give as a gifts]

Our story

I [Rowena] had years of experience as a jewelry designer before i became a mother's in 2006 and developed the jewelery and accessory line Proud MaMa®. It started with a simple necklace with pink and/or blue beads, so you could show that you are a proud mom. The collection was soon expanded with bola,s for the "mothers-to-be". These Bola,s in combination with the Proud MaMa® label were a unique selling point for us.

Yes we are a family business!

Today I,m not longer working on Proud MaMa® alone. We have become a beautiful family business. And we built a great team around us for sales, distribution, warehouse etc. With the design for proud mothers and pregnant women, Proud MaMa® serves many customers in Europe and beyond.

A beautiful result, one to be PROUD of!

BOLA PREGNANCY NECKLACE

After +/- 5 months of pregnancy, the inner ear of the unborn baby is already developed and is connected to the nervous system. When the expectant mother/father rolls the bola over the belly the baby will hear the sound gently and can recognise this after birth.

The soft, soothing sound of the bola has a calming effect on both mother and baby. The sound can create a sense of calm, well-being and can reducing stress. Wearing a pregnancy necklace can help the mother relax and unwind during pregnancy. The sound of the bola can serve as a kind of meditative element.

A pregnancy necklace can become a special ritual for the mother, where she feels connected to her baby and is aware of her pregnancy. This can help create a positive mindset and promote a sense of joy and anticipation during pregnancy.
